

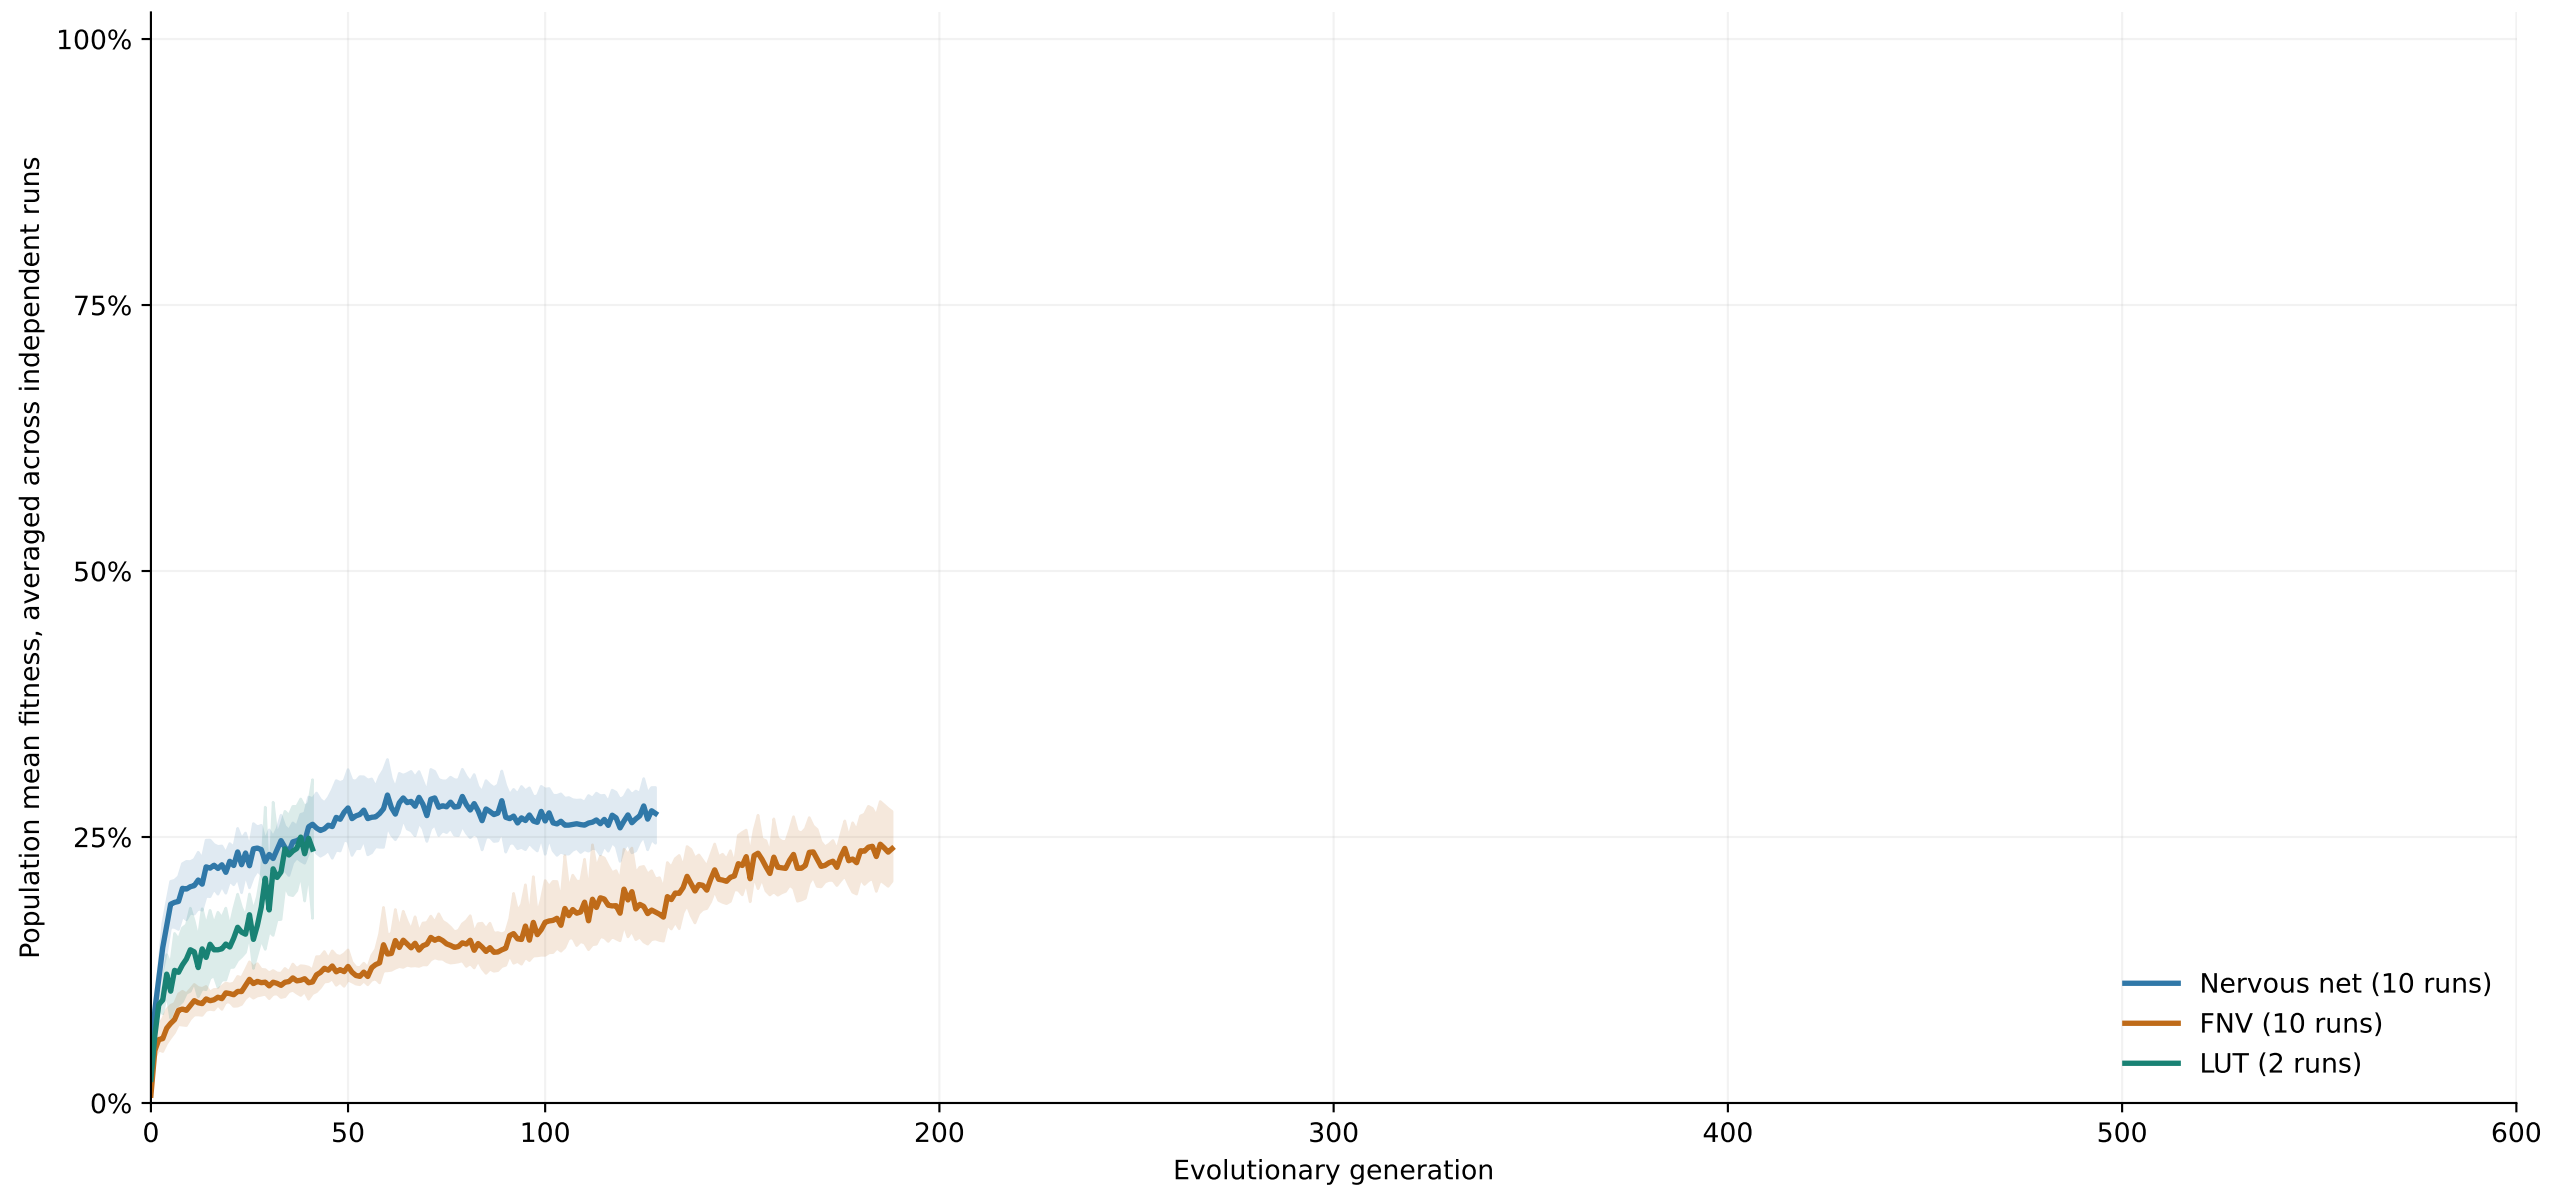

Fig. 16. 2x2 multiplier (temporal): developmental evolution through generation 600.

Population 60 · 10 planned seeds per substrate · one attempt · 10-minute soft / 15-minute hard run cap

Mean and pointwise 95% bootstrap intervals. Dashed portions include assumed population-perfect tails.

Incomplete cohorts stop at their shortest history; failed runs are retained.

Nervous net: 10/10 runs, through g128 | FNV: 10/10 runs, through g188 | LUT: 2/10 runs, through g41
