

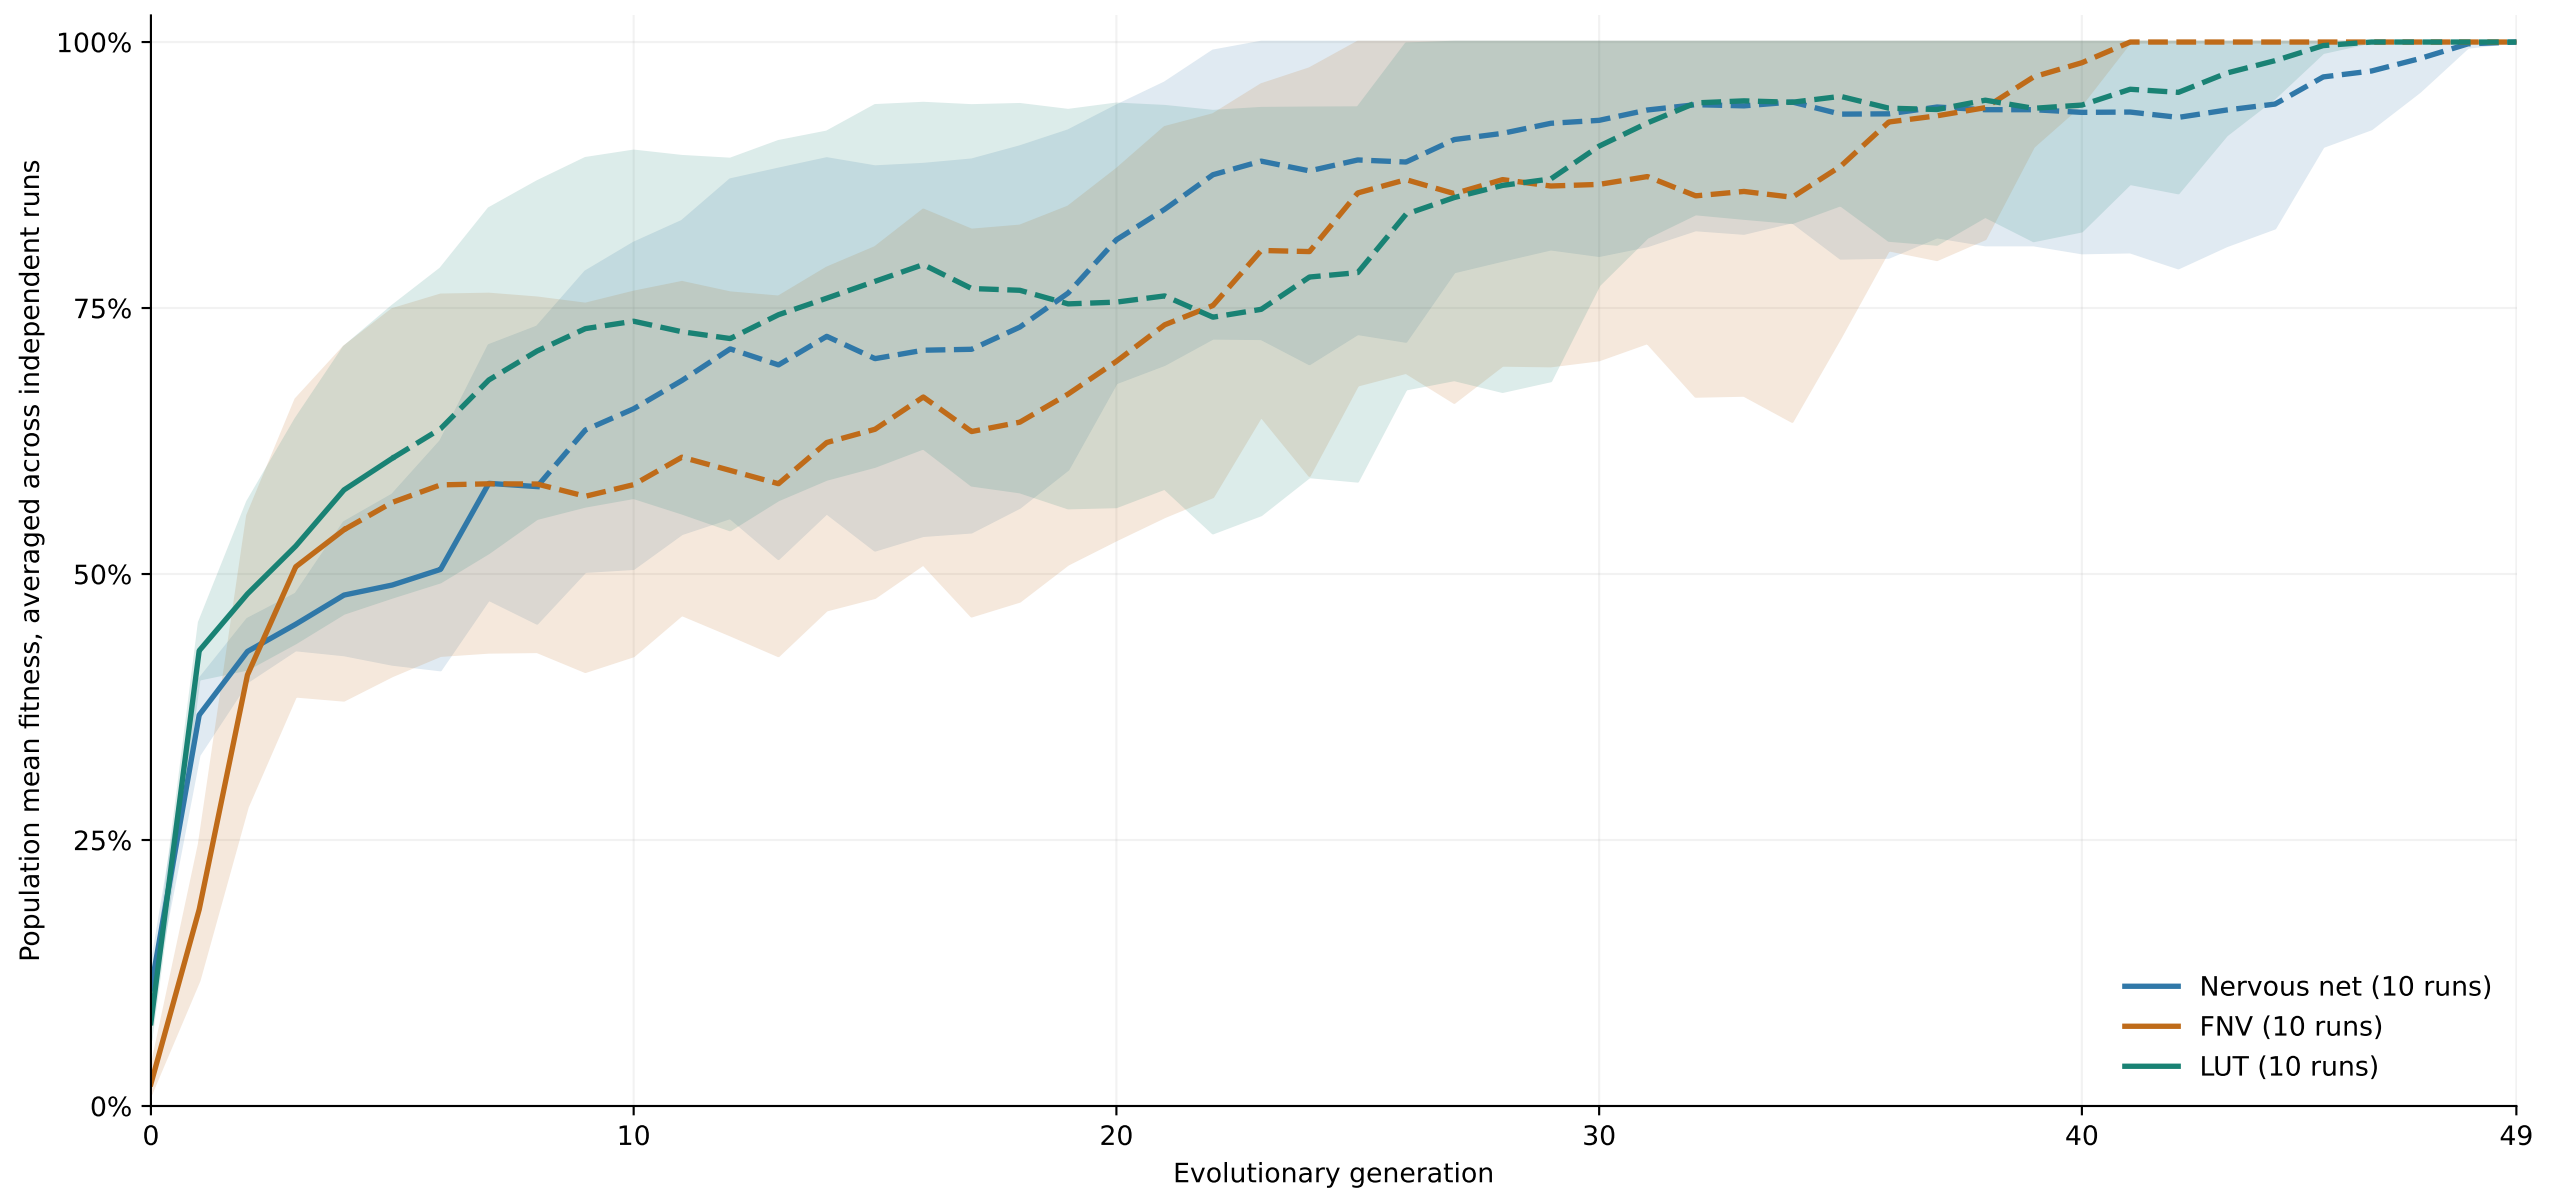

Fig. 1. AND (temporal): developmental evolution through generation 49.

Population 60 · 10 planned seeds per substrate · one attempt · 10-minute soft / 15-minute hard run cap

Mean and pointwise 95% bootstrap intervals. Dashed portions include assumed population-perfect tails.

All 30 runs population-perfect; axis ends at the last solve.

Nervous net: 10/10 runs, through g49 | FNV: 10/10 runs, through g49 | LUT: 10/10 runs, through g49
